PROFESSIONAL SUMMARY

Cybersecurity student at Old Dominion University with hands-on experience in IT support, networking, Linux administration, and cybersecurity fundamentals. Experienced troubleshooting hardware, software, and network issues while supporting end users in fast-paced environments. Currently pursuing CompTIA Security+ and developing practical skills in cloud computing, vulnerability assessment, security operations, and system administration.

TECHNICAL SKILLS

Operating Systems: Linux (Kali), Windows, macOS

Security: Network Security, Access Control, Vulnerability Assessment, System Hardening

Tools: Nmap, GitHub, Virtual Machines, Bash, AWS Fundamentals

Networking: TCP/IP, Routing, IP Addressing, Packet Analysis, Wi-Fi Troubleshooting

Professional: Technical Support, Documentation, Problem Solving, Customer Service

EDUCATION

Old Dominion University — Bachelor of Science in Cybersecurity (Expected May 2027)

GPA: 3.9/4.0

Northern Virginia Community College — Associate of Applied Science

PROFESSIONAL EXPERIENCE

Information Technology Help Desk Technician | Virginia Tech (Jan 2025 – Jun 2025)

- Provided technical support for hardware, software, and network-related issues.
- Assisted with account access, password resets, and system login issues.
- Documented support requests and resolutions using ticketing systems.
- Educated users on cybersecurity best practices and safe computing habits.

Information Technology Specialist | Al-Ihsan Mosque (Jan 2025 – Jan 2026)

- Maintained computers, Wi-Fi networks, and audiovisual systems.
- Provided technical support for events and end users.
- Assisted users with account access and general IT troubleshooting.

Industrial Engineering Intern | Moog Space and Defense Group (Jan 2022 – Aug 2022)

- Supported production operations and identified process inefficiencies.
- Analyzed operational data to improve performance.
- Collaborated with cross-functional teams on improvement initiatives.

Engineer Intern | PepsiCo (Jan 2020 – Dec 2020)

- Assisted in optimizing manufacturing and supply-chain processes.
- Analyzed workflows and identified efficiency improvements.
- Developed data-driven recommendations.

PROJECTS & HANDS-ON EXPERIENCE

Cybersecurity Lab Practice (Self-Directed)

- Conduct hands-on cybersecurity labs using Kali Linux, Nmap, Linux administration, network enumeration, vulnerability identification, and penetration-testing fundamentals.

Cloud Computing Student Project

- Studying AWS cloud services with emphasis on IAM, EC2, storage, cloud security, encryption, monitoring, and cloud architecture.

Cybersecurity Coursework – Old Dominion University

- Studying network security, cryptography, risk management, threat analysis, Linux environments, scripting, and security frameworks.

CERTIFICATIONS

CompTIA Security+ (SY0-701) — In Progress | RBT Certification | CPR/First Aid/AED | OSHA 10
